

Underground Hydrant & Standpipe Ancillaries

RHL offer a range of underground hydrant accessories and ancillaries including manhole lifting keys, false spindle adaptors keys, outlet covers and connection sealing washers.

MANHOLE LIFTING KEYS

Used to lift a manhole cover to gain access to an underground hydrant.

MATERIALS: Blue powder coated mild steel

SIZE: 450mm

FALSE SPINDLE

Used to adapt a hydrant key when a hydrant spindle is non standard (35mm). Simply connect the false spindle into the base of the key or connect directly to the underground hydrant spindle.

MATERIALS: Blue powder coated cast iron

SIZE OPTIONS: 19mm 21mm 23mm
25mm 28mm 32mm
35mm 38mm

UNDERGROUND HYDRANT OUTLET COVER CAP

Used to cap off the hydrant outlet preventing foreign objects from entering the hydrant and contaminating the water.

MATERIALS: Polyamide

STANDPIPE BASE WASHER

Inserted into the female round thread at the base of the standpipe to seal the connection to the hydrant.

MATERIALS: NBR
