## **Super Absorbent Powder**

# SPILL-AID

A unique blend of natural minerals, Spill-Aid is a super absorbent, organic powder manufactured here in the UK.

Developed as an organic and eco-friendly solution for spills, Spill-Aid is highly versatile and highly effective at managing a wide range of spills.

- **Fast acting** - Spill-Aid gets to work as soon as it comes into contact with liquids.
- **Lightweight** - Unbelievably light resulting in an easier application process without the need for carrying large, heavy bags to a spill incident.
- **Reduced disposal costs** - the lightweight composition of Spill-Aid also results in reduced disposal costs of spill materials compared to other loose absorbents.
- **Reduces slip risks** - Spill-Aid will leave a surface with anti-slip properties, ensuring an efficient clean and allowing immediate access to pedestrian traffic, without the risk of slips.
- **Non-Toxic** - Spill-Aid is organic and therefore not harmful to people or the environment.
- **Encapsulates fluids** - unlike other loose absorbents Spill-Aid will absorb liquid particles suppressing odours and reducing the spread of harmful pathogens in the air.

## MADE IN THE UK

Manufactured in the UK, we have 2 sizes of Spill-Aid powder available.

### 30Ltr Spill-Aid Bag

Lightweight, bulk bags of Spill-Aid, weighing approximately 4KG, are designed for larger or more frequent spills. Ideal for warehouses, manufacturing and engineering areas.

### 5Ltr Spill-Aid Pouch

Designed with a resealable press zip and weighing approximately 450 grams, this package is ideal for areas with a risk of small spills such as offices, schools, retail and hospitality. Perfect if you require a small amount of absorbent as you can re-seal the bag for future use.
